ABOUT US

Clinically Experienced
Neurorehabilitation
Therapy and Support

Neuspec is a brain injury support company specialising in supporting the implementation of neurorehabilitation plans for individuals with traumatic brain injury. Our clients present with complex, challenging behaviours and impairments that require clinical expertise to understand the intrinsic nature and effects of the brain and its behaviours. Neuspec offers an innovative and clinically supported platform for bespoke neurorehabilitation support packages facilitated by specialised support teams tailored and trained to multidisciplinary neuro specialities.

clinically experienced

SUPPORT LEAD

We match our cases with the most clinically experienced rehabilitation/therapy assistant based on their experience and background to ensure compatibility and cohesion with each case's needs.

Our resident clinical leads oversee all cases, offering fortnightly 1:1 case clinics to all rehabilitation staff.

Our training empowers a dynamic approach to support adaptive and responsive strategies for each client's progress.

NEURO-INSPIRED

At Neuspec, our team is comprised of highly educated professionals with specialised knowledge in the disciplines of neuroscience and psychology. Many of our team members have studied these complex fields extensively and have the clinical and research experience to form an innovative capstone to client experiences.

This deep academic foundation and practical experience make us trustworthy for clients seeking specialised support. Our work is guided by seasoned professionals who ensure our approach is informed and effective. When you choose Neuspec, you're choosing a team with the skill and dedication needed to deliver the highest standard of care and support.

clinically experienced

To offer an optimal and innovative platform for integrative rehabilitation care and support, providing specialised support teams clinically tailored to multivariate neuro specialities.

To become the number one provider of holistic support packages tailored to neurological conditions, specialising in complex cases involving traumatic brain injury and comorbid neuropsychiatric conditions.

OUR GOALS

To provide a neuro-innovative support platform incorporating multidisciplinary practices of neuroeducation, training and consulting packages as a capstone for excellence. To be inspired by research and clinical neurosciences at the forefront of support packages, grounding quality outcomes for clients.

To bring clinical excellence to every aspect of neurorehabilitation support provided, therapy implementation and client outcomes. To empower clients through their rehabilitation journeys to achieve autonomy.

clinically experienced

OUR PROMISE

- Qualified and experienced rehabilitation/therapy assistants supervised under our resident clinical leads in conjunction with each case's MDT.
- Our Rehabilitation Assistants are selected for their advanced postgraduate training and demonstrated success in managing complex behaviours.
- Our rehabilitation and therapy assistants are provided with in-house clinical supervision by clinical support leads with years of field experience, working on complex cases from the litigation process to neurorehabilitation journeys, equipping staff with the requisite support to empower clients' autonomy.
- Case-specific training to fulfil the skills and knowledge required for the complexities of each case.
- Onboarding training is individualised for each case and developed for the client profile.

clinically experienced

OUR SERVICES

- Wrap-around support packages for clients requiring high levels of support around the clock to achieve their goals, promoting autonomy.
- Independent living trial support packages that enforce and enable individuality, confidence-building, and self-adaptive techniques for clients transitioning into independent living. Neuspec recognises the challenges associated with independent living and optimises the support required for clients, scaffolding their independence.
- We provide psychological and emotional support to clients challenged with emotional dysregulation and mental health pathologies. We help clients understand and regulate their emotions and interactions with their social environments, which are affected by their behavioural interactions and encounters.

clinically experienced

OUR SERVICES

- Neurobehavioural support and mentoring to equip clients with neuro and psychoeducation on how their brain interplays with their behaviour, emotion, and learning process. Neuspec provides clients with strategies for behavioural modification and helps them display positive, pro-social, and socially appropriate behaviours.
- Cognitive rehabilitation to aid clients in regaining or strengthening skills, learning new strategies, and managing daily life responsibilities. We support rehabilitation plans centred around recompensating executive functions such as skills for planning, organisation, concentration, attention, motivation and decision-making. The goal is to improve quality of life, independence, and the ability to return to work and meaningful life engagements.

LOCATION

- Neuspec is located and operates in Greater London, covering all areas of London and its outskirts. For service users outside of London, we can arrange the recruitment and onboarding of staff in the required area to suit the client's needs.
- Please enquire about our recruitment package, which consists of a one-off fee to source specialised staff within the client area and onboard, manage, and train the rehabilitation/therapy assistant.
- The rehabilitation assistants will have the same support and supervision as the staff operating in London, with access to our mandatory training, ongoing training and case support clinics. Further details of our package can be obtained upon initial contact.

GETTING STARTED

1

You contact us
to discuss your
requirements

2

We assess the
support requirements
and present a support plan
to review

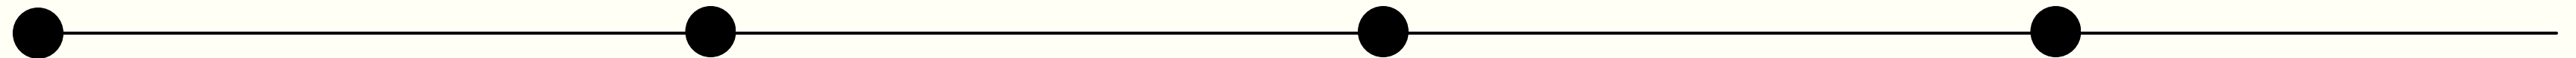

3

Once approved, we
provide terms of
the support package,
and introduce the
support team

4

The contract
is signed, and the service begins

TIMELINE

Initial Contact

Upon initial contact, a referral form is required to be filled out to capture the client's profile and support needs.

Referral Review and Assessment

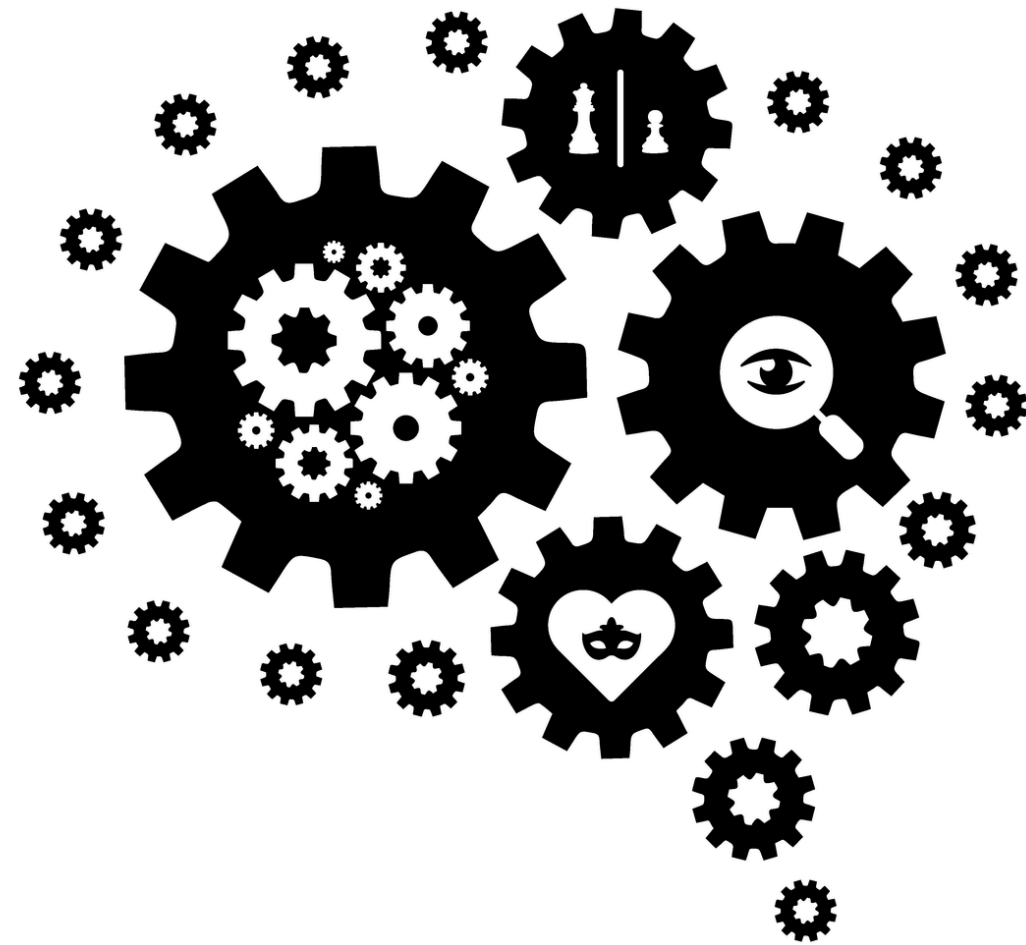

Once received, a member of our operational and clinical support team will review the details of the referral, assessing the client's needs and rehabilitation staff's compatibility.

Support Package

You will receive a quotation for the support required, an outline of the package, and introduction of our carefully selected qualified rehabilitation assistant. The rehabilitation assistant will be agreed upon with case management and the client.

Contract Signed

You will be presented with a contract for our terms of service. Once all terms and conditions are agreed upon and signed, a meet and greet will be arranged for the commencement of support.
